

Money and Macroeconomic Dynamics

- Accounting System Dynamics Approach -

Edition 3.2

User's Guide 2017

Aug, 2017

The folder of MacroSDmodels in this CD contains all companion SD macroeconomic models used in the Edition 3.2 of the book: Money and Macroeconomic Dynamics.

All copyrights are reserved by the author.

To run the companion SD models, first install the free software: Vensim Model Reader (Version 7.2) which is included in the folder of the same name in this CD, or can be free-downloaded from the Web: <http://www.vensim.com/free-download/>

Then open the Vensim Model Reader and select the file you'd like to run. No passwd is required.

Before you run a model, select Control Panel --> Datasets from Toolbar below Menu bar. You will find simulation files in the Loaded-Info Box. Unload all files you don't want to display to the left Available-Info Box by selecting them and clicking <<. Otherwise, all simulation files in the Loaded-Info Box will be displayed on your computer screen, making it look messy.

Your comments and suggestions as well as model bug reports are most welcome for further improvements of the materials. Please send them to the following:
